## URL Customization

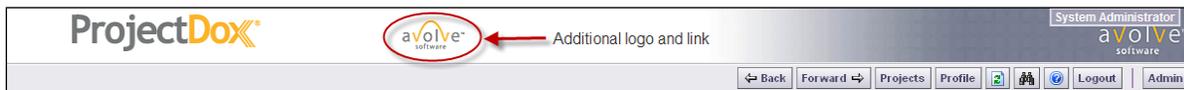

Setting	Location	Comments
LogoURLLogin	Admin\Configuration\Core Tab	URL that LogoImageLogin links to
LogoURL1	Admin\Configuration\Core Tab	Web address (URL) that accompanies logo image on login screen that is beneath the main logo, in the left side of the box. http://www.YourCompanyDomain.com
LogoutNewURL	Admin\Configuration\Core Tab	Displayed on Logout screen. http://www.YourCompanyDomain.com
AppName	Admin\Configuration\Core Tab	ProjectDox
MSIDisplayDescr	Admin\Configuration\Core Tab	ProjectDox Components tool tip
Avolve Trademark		Avolve Trademark wording cannot be customized or removed.

An additional URL link can be added to the login page of ProjectDox utilizing the applications translations section. It can be added by performing the below steps within ProjectDox:

1. Navigate to Admin→Translations→ODD
2. Locate the below setting in the *Phrase* column:
3. {LoginAnchorOpen}MyURL{LoginAnchorMid}{LoginAnchorClose}
4. In the *Translation* column add the URL after {LoginAnchorOpen} and the name to display for the link on the login page after {LoginAnchorMid}
5. Example:{LoginAnchorOpen}http://avs.pdoxonline.com/ProjectDox/HelpFile.html{LoginAnchorMid}Click to View Help File{LoginAnchorClose}
6. Click Save.

An additional logo and link may be added to the home page header. This is displayed upon logging in and is optional.

It can be configured by performing the below steps within the ProjectDox application:

1. Navigate to Admin→Translations→ODD
2. Locate the below setting in the Phrase column:
3. {HeaderAnchorOpen}http://#{HeaderImageOpen}images/spacer.gif{HeaderImageClose}{HeaderAnchorClose}
4. In the Translation column add the desired URL after the {HeaderAnchorOpen}  
{HeaderAnchorOpen}http://google.com
5. Click Enter and enter on the next line after {HeaderImageOpen} add the name of the new image file. (This image file should be located in the images folder in the ProjectDox directory on the Web Server)
6. {HeaderImageOpen}images/IGCLogo.gif
7. Click Enter to go the next line add the close tags:
8. {HeaderImageClose}{HeaderAnchorClose}
9. Click Save.

## Additional Customization

Setting	Dimensions	Location	Comments
Email Seal	194x37	ProjectDoxIcon.png	Image displayed on applicant invitation email for workflow process
Workflow Email Logo	194x37	Pdox.gif	File Location:\Program Files\iMarkup Workgroup\html\pdox
Thumbnail icon	32x32	\ProjectDox\Images\Default.png	For pass-thru files

## Modifying the .css File for ProjectDox

- Site fonts and colors can be customized for ProjectDox through the *Style.css* files.
- The ProjectDox style sheets are located in the ProjectDox\Custom directory. Unless you are very familiar with updating style sheets, we recommend that you contact Avolve to modify the file to your specifications as a professional service.

## Templates

Type	Location	Comments
<b>ProjectDox Emails</b>	Priority  1. Custom\ProjectTemplateCustom 2. Custom\en	Use an HTML Editor or notepad versus Office to edit.  If load balanced, email must be duplicated for each web server.  Only the Custom\en folder will be overwritten during Updates
<b>Email Color Schemes</b>	\ProjectDox\Custom\en\Style.css  \ProjectDox\Custom\Style.css	Web server file system  Must remain in both locations as of 7.7 release
<b>Workflow E-mail Templates</b>	\Program files\iMarkup Workgroup\emails	Changes to these templates are site wide changes and should be saved to the Custom folder. The Custom folder is not overwritten during upgrades.
